RIVERDALE, NY 10463**

Dear Shareholder(s):

Re: Alteration Agreement

Enclosed is the Alteration Application ("Agreement"), which must be completed before alteration work can be initiated in your apartment. The purpose of the renovation package is to insure that any renovation work performed in the building will cause as little disturbance as possible to other owners and tenants. In addition, the procedure ensures licensed contractors will be used to perform critical work and that the work will be done in accordance with the building codes of the city of New York.

Owners seeking to renovate their units will be required to complete the renovation package and to obtain Management and/or Board approval prior to commencing any work which would involve demolition of walls, ceilings, tiles, or the change or addition to any electrical or plumbing system or any other improvements.

The package includes forms which request specific and important information from both the shareholder and his/her contractor.

No exceptions to this policy will be granted, as all work done in the building which requires outside labor, the use of equipment, or the movement of heavy items through the building, can cause both damage to Co-op property and a disturbance to other owners.

Also enclosed is a shareholder Alteration Application Checklist. Please read the Application and ask the professionals and/or contractors working for you to do so as well. The procedures set forth were designed to protect you, your fellow tenants and shareholders and the Apartment Corporation.

You must return to the Managing Agent, the original and one copy of the completed and signed Agreement, along with all required documents. You must also include three checks, **one for three hundred and fifty dollars (\$350.00) made payable to Garthchester Realty** for the non-refundable processing fee, the **second for five hundred dollars (\$500.00) made payable to 750 Kappock Apartments Corp.** representing the Cooperative fee and the **third for one-thousand dollars (\$1,000.00) made payable to 750 Kappock Apartments Corp.** for the Alteration Escrow Deposit; this deposit is subject to modification at the discretion of the Board of Directors and/or Management, dependent upon the scope of work and nature of an Alteration. The Escrow Deposit is refundable upon the satisfactory completion of the Alteration, less any amount required to cover damages resulting from the Alteration. **Escrows will not be refunded until all Department of Buildings (DOB) permits are closed out. A full, complete alteration package must be submitted for review and approval before filing any permits with DOB.** Architect self-certification is not permitted. Once approval is given by the engineer, Board of Directors and/or Managing Agent, your contractor may proceed to file for any necessary permits to begin your apartment renovation and must follow the rules for project commencement.

Please note: the Co-op engineer and superintendent may make periodic inspections during the renovation to observe compliance with the alteration agreement and the approved plans. These engineering visits will be at the shareholder's expense.

Should you have any questions, please feel free to contact the Alteration Processing Department at 914-725-3600, Ext. 3115.

Sincerely,
750 Kappock Apartments Corp.

SHAREHOLDERS ALTERATION PROCEDURE

1. Please note that the following procedures must be followed during your renovation project. The Alteration application must be complete and all items submitted must be marked on the enclosed checklist before it can be forwarded for review. Incomplete applications will not be processed.
2. After the completed package has been submitted and depending on the scope of work, it usually takes two to three weeks for review and a decision.
3. If your Alteration Application is approved, the management office will inform the shareholder and a copy of the fully executed Alteration Agreement will be forwarded to you for your files.
4. The shareholder will pay the expenses if the Alteration Application is submitted to the building's Engineer/Architect for review.
5. Depending upon the scope of alteration work, engineering inspections may become necessary during the renovation to observe compliance with approved plans. The additional expenses for these visits will be borne by the shareholder.
6. If you plan to move plumbing lines or make structural changes to the walls, your architect/contractor must file with the proper division of the Department of Buildings, City of New York. (Please note that no building riser whether plumbing, electrical or otherwise may be relocated at any time.)
7. An asbestos report is required if you are filing with the DOB.
8. If you plan to renovate your bathroom, depending on the extent of renovation, you will be required to replace all branch lines from the riser to the basin, toilet and shower body, including the shower body, toilet lead bend, shower pan, and installation of new ball shut off valves. A NYC licensed plumber will be required to perform this work and it must be filed with the NYC Department of Buildings.
9. If you need to replace the lead pan and toilet bend, you will need access to the apartment below yours to access these items. You, as the shareholder, must contact the resident below and receive permission to access their apartment to perform the plumbing replacement. You will also be responsible for any damages or repairs needed to the apartment below due to your renovation. A form must be included for both the shareholder and adjacent shareholder to sign. The form must include:

 - c. An agreement to set a date and time
 - d. A statement of who will cover the expenses incurred.
10. The plumber must furnish a statement about the work and submit proof that they have filed with the Department of Buildings for plumbing work being done to the apartment. The application must be closed with DOB before your escrow deposit can be returned.
11. The general contractors must inform the Superintendent about the starting date and nature of work to be done before beginning work.
12. All workmen must clean up daily when the day's work is done.
13. No containers for removal of materials are allowed on the premises, unless prior written approval is received from Management. They must be kept on the city streets and the contractor must have permits for their use. Contractor's garbage cannot be left at the site and use of the building's garbage containers or other methods of garbage disposal is prohibited.
14. All contractors must comply with the EPA requirements and provide a copy of the company's EPA Certificate.

15. As a courtesy, prior to starting a construction renovation project, please notify all adjacent apartments on your floor and above and below your apartment by sending a notice that includes the nature of the alteration and approximate starting and completion dates. Please forward all copies of letters sent to your neighbors to the Managing Agent for our records.
16. Please read the Alteration Agreement thoroughly. If you or your architect/contractor have any questions, please contact the Managing Agent.
17. The contactors must have protection for the floors, walls, elevators, etc.
18. The contractors may use the service entrance and the service elevator only (if applicable).

- (b) to take out and maintain the said insurance for and in the name of the condominium or corporation, and, in such a case, the unit owner or shareholder agrees to pay the cost thereof and to furnish all information and consents necessary to permit the condominium or corporation to take out and maintain such insurance for and in the name of the condominium or corporation.

Compliance with the foregoing requirements to carry insurance and furnish certificates shall not relieve the unit owner or shareholder from liability assumed under any provisions of this Agreement.

Further, contractor agrees that, to the fullest extent permitted by law, it will indemnify, hold harmless and defend, at its expense, the building owner, the condominium or corporation, the unit owner or shareholder and the managing agent, tenants/occupants ("indemnitees") against all losses, lawsuits, actions, proceedings, costs, liabilities, expenses and damages, including, without limitation, reasonable attorney's fees and disbursements relating to death, personal injuries or property damage (including the loss of use thereof) arising out of or in connection with any acts or omissions of contractor or subcontractors its agents or employees, including any judgment, award or settlement and any and all costs and expenses related thereto, including, without limitation, court costs and fees, and the costs and expenses of defending and monitoring the foregoing, using counsel reasonably acceptable to the condominium or cooperative and the unit owner or shareholder. This agreement to indemnify specifically contemplates full indemnity in the event of liability imposed against the Indemnitees without negligence and solely by reason of statute, operation of law or otherwise, and partial indemnity in the event of any actual negligence on the part of Indemnitees either causing or contributing to the underlying claim. In that event, indemnification will be limited to any liability imposed over and above that percentage attributable to actual fault, whether by statute, by operation of law or otherwise.

The contractor's insurance policy shall also contain in substance the following endorsement:

This insurance shall not be invalidated should the insured waive, in writing, prior to a loss, any or all right of recovery against any party for the loss occurring to the property described herein.

Nothing in this Rider shall constitute a waiver of or limitation of any other rights or remedies the Corporation may have for consequential damages or otherwise.

EXHIBIT A
NYS Construction Guidelines

The following guidelines are based on the latest COVID-19 guidance from the CDC, OSHA and other publications. Permit holders are responsible for enforcing physical distancing and safety measures on their job sites. These guidelines are meant to help you develop and manage appropriate measures for your job sites.

ENSURE PHYSICAL DISTANCING ON-SITE

- Workers should maintain a distance of six feet from each other whenever possible. Provide tools to help them mark out physical distancing spacing when performing job tasks. Require that workers maintain a distance of six feet when waiting to enter turnstiles, hoists/elevators, stairs, and other shared spaces.
- Prevent workers from congregating during pre-shift meetings, toolbox talks and other similar gatherings.
- Stagger schedules for job functions that put workers close together. For example, workers that perform job functions that are in close proximity can work different shifts or days, or they can have different work start times and end times, including breakfasts and lunch breaks.

OPERATIONS AND PHYSICAL DISTANCING

It is up to permit holders to limit, to the greatest degree possible, all operations where proper physical distancing can't be followed. Examples where this may be an issue could include material delivery, pouring concrete, and the installation of sheet rock or curtain walls. To carry out these complex operations and maintain physical distancing, there are a variety of strategies you can employ, including:

- Replace a worker with mechanical means for operations that require multiple workers.
- Erect temporary barriers for additional protective measures such as: sheet rock, plastic sheeting, plexiglass, etc.

SUGGESTED SAFETY MEASURES

In addition to the above safety precautions, there are a variety of other strategies permit holders should employ to maintain physical distancing to keep your workers, and the public, safe. These include:

- Take Temperatures: Use a no contact thermometer to take workers' temperatures before letting them on the jobsite.
- Hand Washing: Require that all workers wash their hands thoroughly before and after an operation. Add hand washing and hand sanitizing stations throughout your worksite.
- PPE: All workers are required to wear appropriate personal protective equipment (PPE). If a mask is not part of routine PPE used for a specific task, workers should use a face covering – any well-secured paper or cloth (like a bandana or scarf) that covers one's nose and mouth – if they cannot maintain at least 6 feet of distance between themselves and others.
- Temporary Barriers: Erect temporary barriers to keep workers separate during the workday.
- Only Use Your Items: Strongly discourage workers from using other workers' phones, desks, offices, work tools and equipment.
- Disinfect: Regularly clean and disinfect shared tools and equipment.
- Send Sick Workers Home: If anyone is symptomatic send them home and do not let them on the site.
- Effective Quarantine: Workers must stay home if sick. They should not return to work until all the following are true:
 - It has been at least seven days since your symptoms started.
 - You never had fever or you have not had a fever for the prior three days without use of fever-reducing drugs such as Tylenol or ibuprofen.
 - Your overall illness has improved.
- Shut It Down: Close the site if physical distancing cannot be maintained.

INDUSTRY BEST PRACTICES FOR Preventing & Remediating the Contamination of Germs on Construction Sites

Good health habits can help stop the spread of germs and prevent respiratory illnesses. Use these tips to protect yourself and others:

Clean and disinfect frequently touched objects and surfaces.

Clean tools and equipment with disinfectant wipes after each use. For larger tools and equipment, wipe or spray down the surface or tool with a solution of 5 tablespoons (1/3 cup) of bleach per one gallon of water. Allow the solution to sit on the surface for 5 minutes to kill all of the germs.

Wash your hands frequently with soap and water for at least 20 seconds.

Practice proper hygiene. Wash hands thoroughly and often using soap and water for at least 20 seconds. If soap and water are not available, use an alcohol based hand sanitizer.

Cover your cough and sneeze with a tissue then throw the tissue in the trash.

Cover your mouth and nose with a tissue when you cough or sneeze. Use the bend of your arm if a tissue is not available.

WAYS TO REDUCE THE SPREAD OF GERMS

- Practice physical distancing by avoiding groups and gatherings and maintaining a distance of at least 6 feet from other people whenever possible.
- Stagger pre-shift meetings, new hire orientations, and other meetings conducted in-person. These meetings should include information on proper hygiene, keeping surfaces clean, and procedures on what to do if a worker feels sick.
- If a worker is symptomatic encourage he/she must stay home. Supervisors should keep a record or log of all employees who are sent home or stay home.
- Provide workers with access to soap and water so they can wash their hands frequently.
- Give co-workers a friendly reminder if you notice they forget to wash their hands, cover their mouth, or wipe down their equipment after each use.

COVID-19

Symptoms of COVID-19 commonly include:

- Fever
- Cough
- Sore throat
- Shortness of breath.

Supervisors should monitor workers for the symptoms listed above. If anyone on the site is symptomatic, send them home and do not let them on the site

Reopening New York

Construction Guidelines for Employers and Employees

These guidelines apply to all construction businesses in regions of New York that have been permitted to [re-open](#), as well as to construction businesses statewide that were previously permitted to operate as essential.

During the COVID-19 public health emergency, all construction businesses should stay up to date with any changes to state and federal requirements related to construction activities and incorporate those changes into their operations. This guidance is not intended to replace any existing applicable local, state, and federal laws, regulations, and standards.

	Mandatory	Recommended Best Practices
Physical Distancing	<ul style="list-style-type: none">✓ Ensure 6 ft. distance between personnel, unless safety or core function of the work activity requires a shorter distance.✓ Any time personnel are less than 6 ft. apart from one another, personnel must wear acceptable face coverings.✓ For any work occurring indoors, limit workforce presence to no more than 1 worker per 250 sq. ft. on site, excluding supervisors in this calculation, unless additional personal protective measures are implemented (e.g. face coverings at all times).✓ Tightly confined spaces (e.g. elevators, hoists) should be occupied by only one individual at a time, unless all occupants are wearing face coverings. If occupied by more than one person, keep occupancy under 50% of maximum capacity.✓ Post social distancing markers using tape or signs that denote 6 ft. of spacing in commonly used and other applicable areas on the site (e.g. clock in/out stations, health screening stations).✓ Limit in-person gatherings as much as possible and use tele- or video-conferencing whenever possible. Essential in-person gatherings (e.g. meetings) should be held in open, well-ventilated spaces with appropriate social distancing among participants.✓ Establish designated areas for pick-ups and deliveries, limiting contact to the extent possible.	<ul style="list-style-type: none">✓ Create additional space for employees by limiting in-person presence to only personnel necessary for the current task(s), adjusting workplace hours, staggering arrival/departure times, creating A/B teams, and/or scheduling only one team in an area at a time.✓ Modify alignment of workstations to maintain 6 ft. distance and avoid multiple crews and/or teams working in one area. If not feasible, provide and require face coverings or enact physical barriers (e.g. plastic shielding walls), in accordance with OSHA guidelines, in areas where they would not impair air flow, heating, cooling, or ventilation.✓ Reduce bi-directional foot traffic by posting signs with arrows in narrow aisles, hallways, or spaces.✓ Have employees work from home whenever possible.✓ Prohibit non-essential visitors on the site.
